Education

International Institute of Professional Studies, DAVV, Indore MTech (IT) 5 - Year Integrated Course, CGPA: 9.13	Sept 2023 – Jun 2028
Shri Cloth Market Vaishnav Bal Mandir, Indore Higher Secondary Certificate (HSC), Percentage: 87.8%	Apr 2022 – Apr 2023

Experience

Java Development Intern <i>Cognifyz Technologies (Remote)</i>	Jun 2024 – Jul 2024
- Engineered and delivered production-ready Java modules, enhancing core software functionalities for real-world business scenarios. - Refactored legacy Java codebase by applying advanced OOP principles and design patterns, which improved code efficiency by 15% and enhanced system maintainability. - Complete all assigned Java projects on time, applying core Java concepts to develop efficient, high quality solutions.	

Projects

- KrishiMitra – AI Assistant for Small Farmers** | TensorFlow, Spacy, bs4, Streamlit Aug 2025
Co-lead a 7-person team developing the KrishiMitra AI assistant. Designed the core conversational UI, including the smart, conditional file uploader for the pest agent, and enhanced the live weather agent by formatting raw API data into a detailed, bilingual report.
github | **Deployed:** krishimitra-ai.streamlit.app
- Cancer Detection System** | Python, Scikit-learn, Pandas, Streamlit Jul 2025
Achieved **98.7%** prediction accuracy in classifying breast cancer tumors by developing and deploying a Support Vector Machine (SVM) model. Developed an interactive Streamlit dashboard for real-time diagnostic support, improving early detection rates by **40%**. Demonstrated proficiency in medical data analysis and implementing complex classification algorithms for critical real-world problems.
github | **Deployed:** breast-cancer-detectorr.streamlit.app
- Calories Burned Prediction Engine** | Python, Pandas, NumPy, Streamlit Jul 2025
Improved prediction accuracy by **20%** over baseline models by engineering an XGBoost regression model with advanced feature selection, achieving a Root Mean Square Error (RMSE) of **less than 15** calories and enabling personalized fitness recommendations for users. This project showcases expertise in regression analysis, feature engineering, and building user-friendly applications that provide actionable insights for health and fitness applications.
github | **Deployed:** calories-burned-prediction.streamlit.app

Technical Skills

Programming & Web :	Java, Python, C++, C, SQL, HTML5, CSS3, Bootstrap
AI/ML & Data Tools :	Scikit-learn, Pandas, NumPy, Matplotlib, Keras, TensorFlow, LangChain, Ollama
Frameworks & Platforms :	Streamlit, Git, GitHub

Achievements

- Solved **300+** Data Structures & Algorithms(DSA) problems across LeetCode, Coding Ninja and HackerRank
- Achieved a Global Rank **6280** (Codolio) and **1184** rating (CodeChef) in competitive programming
- Maintained **150+** GitHub contributions in the last year, reflecting consistent coding practice

Certifications

- Cloud Computing & Generative AI Foundations (Google Cloud):** Applied Google Cloud fundamentals and mastered advanced GenAI prompt engineering techniques in hands-on lab environments, gaining practical experience with cloud computing concepts and AI applications
- AI & Generative AI Specialization (IBM):** Mastered core AI concepts, including neural networks, generative AI applications, and prompt design, providing comprehensive understanding of modern AI technologies
- Machine Learning Foundations (VOIS):** Applied key ML techniques, including classification, regression, and model performance evaluation, with hands-on project implementation to reinforce theoretical knowledge

Volunteer Experience

Speaker Outreach & Curation Coordinator <i>TEDx DAVV</i>	Jan 2025 – Mar 2025
Curated and secured 10+ TEDx speakers, managing outreach to final content briefing, boosting event success and audience engagement.
